SUMMARY RESULTS OF ACTUARIAL VALUATION

Your Retirement System's financial objective is to accumulate the assets necessary to pay the promised benefits in an orderly manner. To accomplish this, contribution rates are established in a manner that is designed to keep those rates approximately level as a certain dollar amount from year to year. The Board of Trustees of the City of Pontiac General Employees' Retirement System confirms that the System provides for the payment of the required employer contribution as described in Section 38.1140m of Michigan Public Act No. 728. To determine an appropriate employer contribution level for the ensuing year and to gauge how the System's funding is meeting this fundamental objective, an independent firm of actuaries and employee benefit consultants, Rodwan Consulting, conducts annual actuarial valuations.

These valuations are based on your System's past experience, information about current participation and financial markets, and assumptions concerning the System's future demographic and economic activity. The results of the December 31, 2013 valuation, based on the established funding objective, are summarized below:
